Thanks for the feedback Brian and very glad to hear that its going well. It sounds like the Army is also happy and talking of a long term partnership.

Best regards,

Matt

Subject: NASA flights at Radford Army Ammunition Plant

Hi, Matt.

I just wanted to let you know that NASA's flights for DoD at Radford are working out very well. The UAS has performed admirably and our sampling has been going even better than I had hoped.

I'm most impressed with Ved's skill, knowledge, and performance. He has been doing a great job piloting, is flexible to deal with local constraints, and very easy to work with. If he ever decides to leave NASA, please send him our way!

Respectfully,

Brian
